TURBOMED ENERGY

CHARGING THE FUTURE

Powering a brighter tomorrow with clean and reliable energy. We're charging the future by fueling progress, inspiring change, and empowering communities to thrive.

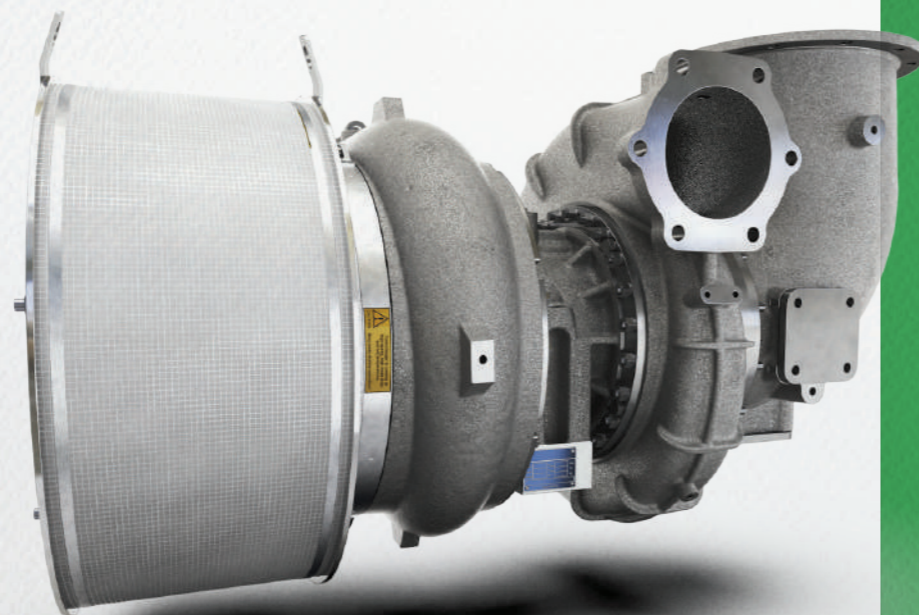

turbomedenergy.com →

TURBOMED ENERGY is a specialized engineering company delivering advanced turbocharger services and worldwide spare parts solutions for diesel and Gas fueled power generation applications, including biogas, natural gas and hydrogen blends.

With more than **50 years of combined industry experience**, we provide high-level technical expertise supported by highly skilled field service engineers, modern workshop facilities and advanced diagnostic and balancing technologies.

We support **power plants, CHP installations and energy projects worldwide**, ensuring maximum operational reliability, efficiency and availability.

Engine & Turbocharger Services

TURBOMED ENERGY offers comprehensive turbocharger support including:

- On-site overhauls, preventive and scheduled maintenance
- Advanced diagnostics, troubleshooting, and 24/7 emergency response
- Rotor dynamic balancing – on-site field service (portable balancing equipment)
- Turbocharger cartridge exchange supply & rotation service programs
- Component repairs and reconditioning
- Turbocharger units' refurbishment and performance restoration
- Performance upgrades and retrofit solutions

Our field teams are equipped with advanced portable dynamic balancing systems and precision measurement tools, enabling fast and reliable on-site support worldwide.

Sustainability is an integral part of our engineering approach.

By optimizing turbocharger performance and extending equipment life cycles, we help power generation facilities operate with improved efficiency, reduced fuel consumption, and lower emissions.

Through advanced diagnostics, refurbishment, and upgrade solutions, we support a more reliable and environmentally responsible energy future.

Worldwide Spare Parts Supply & Technical Support

We provide global supply and logistics support for:

- High-quality spare parts for all turbocharger brands and types
- Complete turbocharger units, new, reconditioned and exchange solutions to minimize downtime
- Turbocharger cartridges, new or reconditioned and exchange solutions to minimize downtime
- Stocked Service kit for the most popular brands and types

Our global network ensures rapid dispatch, technical assistance and accurate parts identification to minimize downtime and secure plant performance.

Our Commitment

Our solutions are engineered to maximize:

Operational reliability

Efficiency and performance

Lifecycle cost optimization

By combining engineering excellence, rapid response capability and global spare parts availability, **TURBOMED ENERGY** is a trusted partner for turbocharger support in modern power generation and energy systems worldwide.
